### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 21 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-8 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Montenieri et al (US 6,343,718).

Montenieri et al disclose in Figures 1-4 a syringe capable of storing a medical agent comprising an outer tube (14) with an inside in a decompressed and sterilized state before use and further including an annular relief portion (32), a gasket (34), a sealing film (80 and 86), an extension/contraction pusher (15) with a rupture portion (15a) and connection portion for connection with the gasket, a support member (82) having a hollow cylindrical portion, and a movement preventative member (58).

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3767

2. Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Montenieri et al as modified by McWethy et al (US 2002/0169421).

Montenieri et al disclose the claimed invention except for a lock for locking the pusher to the support member. McWethy et al disclose in Figure 1 a lock (54 and 85) for locking the pusher to the plunger which prevents the pusher from moving in a longitudinal direction until the pusher is rotated relative the support member. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system of Montenieri et al with a locking system as taught by McWethy et al, since such a modification would prevent the pusher from being used prior to intended use.

#### *Response to Arguments*

3. Applicant's arguments, see response, filed 11/21/2006 with respect to the abstract have been fully considered and are persuasive. The objection of the abstract has been withdrawn.
4. Applicant's arguments filed 11/21/2006 have been fully considered but they are not persuasive. Applicant argues that the support member of Montenieri does not have a hollow cylindrical portion for supporting the dasher rod before use. Montenieri discloses in Figure 2 the support member having a hollow cylindrical portion (94).

#### *Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period

Art Unit: 3767

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
